

SUPREME APPENDIX BELT - NEXBELT SUPREME APPENDIX BELT COYOTE

NEXBELT SUPREME APPENDIX BELT Nexbelt designed the Supreme Appendix belt specifically for the appendix carrier. With their compact buckle design and incredibly adjustable latch system, you'll have all the room you need to comfortably carry your protection device and even extra magazines upfront. The buckle can be worn front and center, on your left or right hip, or hidden near the back curve. That same flexible design also allows the CCW and belt to move with you throughout the day. This key feature limits the jabbing common to most appendix-carry belts while maintaining your protection device's total security. With a new push-button trigger, the release is quick and easy when needed but still firm when on the go. Though they designed it for appendix carry, this belt's versatility and sturdiness allow the person to switch to OWB or IWB on the hip. Our nylon straps are made from a super-high-density microfiber material, an advanced composite of ultra-fine polyester fibers. This allows the stiffness required for holstering your protection device if you have a CCW permit or just your everyday tools. This ratchet belt also makes a great work belt. FEATURES The flexible design allows for supreme comfort Compact, yet rugged buckle design The new push-button trigger for easy release without sacrificing security Buckle Specs: Granite Black - Powder-coated textured for increased wear resistance Has 3 set screws for a more reliable hold Constructed using stainless steel set screws and not pins for a reliable hold (patent pending) Belt Buckle size: 1 ½ x 1 11/16" Strap: The backing is sweat-resistant Strap thickness near 3/16" The strap width is 1 ½" The nylon strap fits up to 50" waist
